ABOUT LEI

Link Empower Innovations (LEI) is the strategic advisory and consulting arm of Link Empower, helping organizations navigate enterprise transformation, AI adoption, workforce change, and complex stakeholder environments.

LEI works with public-sector, private-sector, nonprofit, and cross-sector organizations to align strategy, people, capabilities, governance, technology, and partnerships around measurable outcomes.

Through a principal-led advisory model, LEI combines enterprise transformation experience, workforce and learning strategy, organizational change, and ecosystem development to help leaders assess complex challenges, strengthen organizational readiness, develop actionable strategies, and move from strategy to execution.

WHY LEI

- **Principal-Led Strategic Advisory**
Senior-level strategic engagement with direct leadership involvement from assessment through execution.
- **Enterprise + Ecosystem Perspective**
We connect internal organizational transformation with the external partners, stakeholders, and capabilities required to sustain it.
- **Cross-Sector Experience**
Experience spanning enterprise, technology, workforce, community, nonprofit, and cross-sector environments.
- **Workforce-Centered Transformation**
We recognize that sustainable transformation requires more than technology. It requires people, capabilities, leadership, and organizational readiness.
- **Flexible Delivery Model**
Principal-led advisory supported by specialized partner and consultant capacity based on engagement scope and requirements.

CORE CAPABILITIES

- **AI Adoption & Organizational Readiness**
Helping organizations prepare their people, leaders, and operating environments for responsible and sustainable AI adoption.
Capabilities: AI readiness assessments • Workforce AI enablement • AI literacy and learning strategy • Leadership alignment • Adoption and change planning • Use-case prioritization • Implementation roadmaps
- **Enterprise Transformation & Change**
Supporting complex transformation initiatives by connecting strategy, governance, people, and execution.
Capabilities: Organizational diagnostics • Change readiness • Program and governance design • Operating alignment • Cross-functional coordination • Stakeholder alignment • Transformation roadmaps • Implementation enablement
- **Workforce & Learning Strategy**
Building workforce capabilities that help organizations adapt to changing technologies, operating models, and market demands.
Capabilities: Workforce capability assessments • Learning and development strategy • Workforce readiness • Upskilling and reskilling • Leadership development • Training and curriculum design • Talent pipeline strategy • Future-of-work planning
- **Ecosystem & Partnership Strategy**
Designing partnerships and stakeholder ecosystems that connect organizations to capabilities, communities, and opportunities.
Capabilities: Ecosystem mapping • Partnership architecture • Stakeholder engagement • Cross-sector collaboration • Community engagement • Convening and program design • Partner activation • Opportunity pathway development
